

SUMMARY.

The "Times" discusses anticipated a separation of the Pacific, as a result of the war. The paper suggests, however, that the Empire will be able to choose between a single fleet and a number of smaller ones. A single fleet, under single command, is the "Times" view. The paper also discusses the "Daily News" view, which is that the Empire should have a number of smaller fleets, each under its own command. The paper also discusses the "Daily News" view, which is that the Empire should have a number of smaller fleets, each under its own command. The paper also discusses the "Daily News" view, which is that the Empire should have a number of smaller fleets, each under its own command.

**FARM AND STATION.**  
—  
**MOISTURE IN BUTTER.**

In the principal tobacco districts it is customary to sow the seed in the field as soon as the danger of frost is past. This period varies according to the altitude and other local conditions.

The Right Rev. Monsignor Carroll, Senior Vicar-General of the Roman Catholic Diocese of Sydney, and pastor of the Sacred Heart Church, at Darlinghurst, with which he was connected for the past 27 years, died on Saturday morning, aged 77.

with it and also the name or initials of the person who named it. I find that the person's name or initials tends itself to help one retain in memory the botanical name of the plant. Should also like to know name of a grass: vernacularly known as Zago grass.

Mr. T. E. Griggs, Maira Creek, writes: In reply to Mr. J. H. Wilson: My experience is not the same as your correspondent's, a kindergarten grass, and splendidly on cleared land. In fact, I never saw better grass than which was growing on the railway line last

dog-count was given over to the departure-  
ing of sheep. I am happy to say I am at one  
with your correspondent when he says he  
likes the grasses as they come in at differ-  
ent times in the fall. I believe the reason for  
this is that he likes them all some better  
than others. So I shall make bold to name a half  
a dozen grasses that I deem as being the  
best of the bunch. I shall bracket them  
in pairs: King Mitchell and Chinleño,  
Blue and Crow's foot or Burke grass a con-  
siderable respondent, *serotina* prefers to call it  
Pinudo and Kangaroo.

As the botanical name of Flinders grass has  
completely slipped my memory, could any of  
your correspondents or anyone else oblige by

The disease of tobacco which appears to be mostly of the combination of New South Wales growers are—first, the yellow leaf, suitable for cigarettes, and mild, sweet-smelling tobacco, for which sandy, well-drained soils of moderate fertility are most suitable; dark coloured (rich brown and mahogany), rather heavy leaf, for plug manufacturing purposes, for which richer, well-drained sandy loams on level upland are best; and, thirdly, a very rich, heavy leaf, of moderate coarse, large-ribbed character, for which a very rich, heavy black, sandy soil is best.

to be clean, brown, or chocolate, but deep black in color, may produce a really good seed for use for plug liners or dark smoking tobacco. It is largely used in this State for the purpose of making cigars. The seed will germinate in 10 to 15 days, and if sown well pulverized. The rows should be 30 to 40 feet apart. Narrower rows will make the ploughing heavier. The first row should be sown with the seed, and the second row should be sown without bringing the sub soil to the surface. It has been demonstrated that the second row should be sown in the first strike deeper, and thus render the soil more friable. In the third row the seed should be sown in the furrow, and the fourth row should be sown in the ridge. In the fifth row the seed should be sown in the furrow, and the sixth row should be sown in the ridge. In the seventh row the seed should be sown in the furrow, and the eighth row should be sown in the ridge. In the ninth row the seed should be sown in the furrow, and the tenth row should be sown in the ridge. In the eleventh row the seed should be sown in the furrow, and the twelfth row should be sown in the ridge. In the thirteenth row the seed should be sown in the furrow, and the fourteenth row should be sown in the ridge. In the fifteenth row the seed should be sown in the furrow, and the sixteenth row should be sown in the ridge. In the seventeenth row the seed should be sown in the furrow, and the eighteenth row should be sown in the ridge. In the nineteenth row the seed should be sown in the furrow, and the twentieth row should be sown in the ridge. In the twenty-first row the seed should be sown in the furrow, and the twenty-second row should be sown in the ridge. In the twenty-third row the seed should be sown in the furrow, and the twenty-fourth row should be sown in the ridge. In the twenty-fifth row the seed should be sown in the furrow, and the twenty-sixth row should be sown in the ridge. In the twenty-seventh row the seed should be sown in the furrow, and the twenty-eighth row should be sown in the ridge. In the twenty-ninth row the seed should be sown in the furrow, and the thirtieth row should be sown in the ridge. In the thirty-first row the seed should be sown in the furrow, and the thirty-second row should be sown in the ridge. In the thirty-third row the seed should be sown in the furrow, and the thirty-fourth row should be sown in the ridge. In the thirty-fifth row the seed should be sown in the furrow, and the thirty-sixth row should be sown in the ridge. In the thirty-seventh row the seed should be sown in the furrow, and the thirty-eighth row should be sown in the ridge. In the thirty-ninth row the seed should be sown in the furrow, and the fortieth row should be sown in the ridge. In the forty-first row the seed should be sown in the furrow, and the forty-second row should be sown in the ridge. In the forty-third row the seed should be sown in the furrow, and the forty-fourth row should be sown in the ridge. In the forty-fifth row the seed should be sown in the furrow, and the forty-sixth row should be sown in the ridge. In the forty-seventh row the seed should be sown in the furrow, and the forty-eighth row should be sown in the ridge. In the forty-ninth row the seed should be sown in the furrow, and the fiftieth row should be sown in the ridge. In the fifty-first row the seed should be sown in the furrow, and the fifty-second row should be sown in the ridge. In the fifty-third row the seed should be sown in the furrow, and the fifty-fourth row should be sown in the ridge. In the fifty-fifth row the seed should be sown in the furrow, and the fifty-sixth row should be sown in the ridge. In the fifty-seventh row the seed should be sown in the furrow, and the fifty-eighth row should be sown in the ridge. In the fifty-ninth row the seed should be sown in the furrow, and the sixtieth row should be sown in the ridge. In the sixty-first row the seed should be sown in the furrow, and the sixty-second row should be sown in the ridge. In the sixty-third row the seed should be sown in the furrow, and the sixty-fourth row should be sown in the ridge. In the sixty-fifth row the seed should be sown in the furrow, and the sixty-sixth row should be sown in the ridge. In the sixty-seventh row the seed should be sown in the furrow, and the sixty-eighth row should be sown in the ridge. In the sixty-ninth row the seed should be sown in the furrow, and the seventieth row should be sown in the ridge. In the seventy-first row the seed should be sown in the furrow, and the seventy-second row should be sown in the ridge. In the seventy-third row the seed should be sown in the furrow, and the seventy-fourth row should be sown in the ridge. In the seventy-fifth row the seed should be sown in the furrow, and the seventy-sixth row should be sown in the ridge. In the seventy-seventh row the seed should be sown in the furrow, and the seventy-eighth row should be sown in the ridge. In the seventy-ninth row the seed should be sown in the furrow, and the eightieth row should be sown in the ridge. In the eighty-first row the seed should be sown in the furrow, and the eighty-second row should be sown in the ridge. In the eighty-third row the seed should be sown in the furrow, and the eighty-fourth row should be sown in the ridge. In the eighty-fifth row the seed should be sown in the furrow, and the eighty-sixth row should be sown in the ridge. In the eighty-seventh row the seed should be sown in the furrow, and the eighty-eighth row should be sown in the ridge. In the eighty-ninth row the seed should be sown in the furrow, and the ninetieth row should be sown in the ridge. In the ninety-first row the seed should be sown in the furrow, and the ninety-second row should be sown in the ridge. In the ninety-third row the seed should be sown in the furrow, and the ninety-fourth row should be sown in the ridge. In the ninety-fifth row the seed should be sown in the furrow, and the ninety-sixth row should be sown in the ridge. In the ninety-seventh row the seed should be sown in the furrow, and the ninety-eighth row should be sown in the ridge. In the ninety-ninth row the seed should be sown in the furrow, and the hundredth row should be sown in the ridge.

[illegible]

The monthly meeting of the council was held on Friday, when there was a report by Mr. Francis Sutor (president) presiding. The secretary reported having visited the Agricultural Hall and seen the magnificent exhibition. Works on the Show Ground were proceeding satisfactorily, the Agricultural Hall was being erected, and the works of making up the open space previously occupied by the old main pavilion, was being completed. The new Agricultural Hall was well under way, and tenders would be called at the next meeting for the brickwork and the roof of the new hall on the Show Ground.

The council, having considered a resolution by Mr. T. J. Hosking, president of the society, that the council should consider the expediency of erecting a tablet in the new hall it was decided to name the building "The Royal Show Ground."

Reports were received from the special lighting committee, who recommended that the Agricultural Hall should be lit with electric light. This was adopted by the council, and the committee were authorized to build the building which would be devoted to the women's industries at the Royal show with glass and electric lighting.

It was resolved to continue the competition principle in the vehicle group at the next show, and to accede as to the future policy in connection with that section

MELBOURNE.—Mr. G. H. Pritchard, secretary to the Australian Sugar Producers' Association, which comprises the large millers and growers, to-day presented to the Minister for Customs, Mr. Tudor, a number of protests against the new schedule of rates and conditions in the sugar industry, issued by him, and urged that the regulations be reconsidered. The Minister declined to accede to this request. Mr. Pritchard then made various suggestions to him, which he promised to consider.

**BRISBANE.**—In connection with the suggestion regarding the abolition of the excise and bounty on sugar, it is interesting to note that a small quantity of sugar is grown now with black labour. In 1902 the proportion was 64 per cent. In the last two years—1910-11 and 1911-12—the quantity of cane produced with white labour was 92.81 per cent., and 94.42 per cent. respectively.

**ALSTONVILLE.**—The balance-sheet presented at the seventeenth bi-annual meeting of the Alstonville Dairy Producers' Marketing Company showed a net profit on the profit and loss account of £178. Some £15,820 was distributed to the shareholders. The directors recommended that the profits be distributed as follows:—A farthing per lb to suppliers of butter for the half-year, amounting to £202 to the 24 and 26 pence shares in supplying the shareholders. The quantity of butter manufactured during the half-year was 407 tons. The directors also recommended that the profits of the period of last year, attributable to the dry weather conditions in the early part of the year, not distributed in the previous year, should be distributed among the suppliers.

**BOWRAVILLE.**—Mr. Haydon, of Westland, has been appointed manager of the Bowraville Dairy Producers' Marketing Co., Ltd. Mr. F. W. Lane has been re-elected chairman of directors.

**INVERELL.**—The Inverell Co-operative Dairy Producers' Marketing Co., Ltd., has

We have a long way to travel before we reach the stage when our wheat-growers will realize that, to carry on the industry on profitable lines, they must make the most of the general adherence to following has not been attained, although this is even a greater reason for the course a cross. Nevertheless, the reputation will make as the result of enlightenment on the part of the man who is working the land and the growth of a new generation of wheat-growers. Nevertheless, the wheat-grower is not "old enough" Higher land values and other exigencies will no doubt compel the farmer of to-morrow to study his soil more closely than he does to-day, and to the higher position occupied in the community, by the farmer, which will surely be the case will likewise induce study. Smaller holdings will be more numerous, and the farmer will produce a better type of farmer; it will be necessary if he is going to make a living, to the continuation of his excellent articles on "The Wheat-grower's Problem," and on "Preparing in the Victorian" (*Journal of Agriculture*), and are worth attention by every grower. A. E. W. Richardson writes relative to the wheat-grower's problem:

"The most important advantage accruing to the wheat-grower is the fact that the

from a rational system of crop rotation is that it leads to the best possible utilisation of the soil. Different crops vary very widely in their requirements of soil fertility, and when they obtain their nutriment from the soil, they leave it poorer. Some obtain it from relatively shallow depths, others from deeper layers, and so on. By alternating such crops the store of fertility is more evenly used up. A well-planned system of crop rotation also enables the farmer to make a more uniform distribution of labour throughout the year, and thus enables a farmer to effect a more efficient use of his labour and of his farm hand. Moreover, it aids in preventing the ravages of disease, for crops susceptible to certain diseases are not grown in succession, and are liable to be attacked when grown in rotation with other crops. An illustration of this may be seen in the case of the potato, which is liable to be attacked by a disease called blight. It enables land to be used to a full advantage without the employment of special labour, for where one crop is sown, the labour of the farmer is not so much favoured by that crop cannot be kept in the

**NARROWING.**—As a result of the recent rains, the wheat crops are looking splendid, while all other crops are coming forward well.

**RICHMOND.**—By far the heaviest fall of frost this year was experienced this morning, the whole aspect being a scene of whiteness. This will have a detrimental effect on the forwardness of maturing and summer fruit. Blossoming will receive a check from early breaking. Early growers of tomatoes will also have to defer planting.

Hose that will wear. Yes! And be comfortable, too! Light in weight, cool, fast—the David Jones' Hosiery. The prices given below are of some specially good values in durable Cotton Hose for women. They come from the most skilled Manufacturers, who, through care and through employing experts, through scientific knitting, and by selected means of all these superiorities of making, are able to produce a soft, comfortable, durable summer hose. Such is the quality we offer you at the following prices:

Ladies' Black Hose, with Hand-embroidered Fronts, in fancy designs, in Black, Green, and Blue. 1/6 Pair.

Coloured Mercerized Little Hose, with vertical stripes in higher shades of Blue, Champagne, Green, Mole, Grey, Brown, and Black. 1/11 Pair.

Fine quality Black Little Hose, with fancy Hand-embroidered designs, in Pink and Green. 1/11 Pair.

Black Mercerized Cotton Hose, full fashioned, very durable. With coloured stripes. Black, Blue, and Green. 1/6 Pair.

All Sizes 1/6 Pair.

## The Last Advice of Fashion. Whips—Bags from Paris—Papiillon Pompadour.

The very latest material for Tailor Makers is Whipcord, in Navy, Electric, Grey, Cinnamon, Brown, Mole, and Light Navy. 4/6 yd.

Downstairs in our Hand Bag Department, we have just opened a collection of Bags for the Race Meeting. They are of various materials—some in leather, others in silk, the latter being studded with diamond beads. These are at the moment the very latest thing in Hand Bags from Paris.

The very newest for Afternoon Frocks—Papiillon Pompadour—a soft clinging texture, in pure silk, with small Black Crossbar and Floral design in Pink Rosebuds; also in blue. This design, which we are showing in our Silk Department, is exactly the same to texture as shown in the new mode illustrations in "The Parisienne" and leading Fashion Journals. Papiillon Pompadour is 50 inches wide. 7/11 yd.

## ECONOMICAL BLOUSES AND 21/- TRIMMED MILLINERY.

## BROKEN FAITH.

## PANAMA CANAL BILL.

## MR. TAFT CRITICISED.

LONDON, Aug. 31. The "Daily Mail" writes: "The United States has only one ground for refusing to submit the Panama Canal dispute to arbitration, namely, that having broken one treaty Mr. Taft and the Senate may insist on a right to break another."

The "Vossische Zeitung" (Berlin) writes: "Mr. Taft on the expectation of his return to submit the Panama Canal matter to arbitration, and for the disregard of treaties, including his own arbitration proposals of a few months ago."

A RESCINDING BILL.

WASHINGTON, Sept. 1. Senator Simmons secured the support of the Interstate Commerce Committee of the Senate before the adjournment, and consequently he will press during next session of Congress a bill rescinding in the Panama Canal Act the provision exempting coastwise vessels from toll.

Senator Simmons is confident that he will secure a large measure of support for his bill.

MR. TAFT'S FAILURE.

There is an increasing body of public opinion in favour of the British attitude. Mr. Taft's efforts to make a case have failed to convince some of his own supporters.

BRITAIN MARKS TIME.

The British Government will not do anything further until the December session of Congress. A. Mitchell-Innes, Counselor of the Embassy in London, is spending a holiday in Maine.

A FRENCH SUGGESTION.

PARIS, Aug. 30. M. Buisson Varilla, who suggested the sale of the Panama Canal to the United States, believes if Great Britain and America concluded a convention whereby the proceeds from the canal tolls should exclusively cover working expenses, interest, and the reimbursement of capital invested, the whole question could be settled.

THE CONVENTION COULD SUPPLEMENT AND EXPLAIN THE HAY-PANCOFF TREATY, and the Panama Canal Act could be repealed.

CHINA AND THIBET.

SIR JOHN JORDAN'S MEMORANDUM.

PEKING, Aug. 31. The memorandum to the Chinese Government by Sir John Jordan, British Minister at Peking, states that any attempt to re-establish Chinese authority in Thibet will violate the Anglo-Chinese treaty of 1906.

Britain, he says, fully recognizes China's suzerainty, and disclaims any intention to interfere with Thibet's integrity and administration, but she does not consent to the assertion of Chinese sovereignty over a State enjoying an independent treaty with Britain.

UNITED STATES ATTITUDE.

WASHINGTON, Sept. 1. The United States Government does not intend to oppose the action of Britain in forwarding a Note to the Chinese Government demanding to be consulted before any action is taken in regard to Thibet.

CABLE RATES.

MR. PELLETIER'S VIEWS.

LONDON, Aug. 31. Mr. L. P. Pelletier, Canadian Postmaster-General, in an interview at Liverpool, stated that Mr. H. L. Samuel, the British Postmaster-General, by virtue of the powers under the Convention of 1906, is endeavouring to reduce their rates between Canada and Britain by consent instead of by Ministerial decree.

Canada, he said, was not bound to accept the Western Union's deferred rates. He added: "Our liberty of action remains unimpaired because our sister overseas dominions, with whom we desire to act in unison, must be consulted about the future course of events."

SHOCKING FATALITY.

LAD'S TERRIBLE FALL.

PLINT (Michigan), Aug. 31. A small boy, twelve years of age, was caught in a rope trailing from a balloon and lifted to a height of 2000 ft in the air.

The aeronaut worked frantically to pull the rope into the car, but failed, and the lad fell to the earth, crashing through the roof of a house.

A huge crowd witnessed the tragedy, and many women fainted.

APPEAL TO UNITED STATES.

BY FRENCH CANADIANS.

QUEBEC, Aug. 31. The descendants of the old French settlers, the earliest colonists of Quebec, held a public meeting last night, at which a resolution was agreed to demand arbitration on their grievances by the Hague Tribunal.

They claim that they have been dispossessed of their lands held by treaty.

The meeting drew up a memorial to the United States Government, asking the United States to insist that their claims should be arbitrated upon.

BRITISH MANOEUVRES.

GERMAN OFFICER'S INSPECTION.

BERLIN, Aug. 30. Captain Petersen, naval expert on the staff of the "Tagblatt," describes a visit he made to Harwich, Essex, during which he was not molested, although he made a close inspection during firing from the batteries and warships. He also visited the batteries of the targets and watched night attack and other manoeuvres that were carried out by torpedo-boats.

TURKEY AND GREECE.

SKIRMISH ON THE FRONTIER.

ATHENS, Aug. 30. The Turks attacked four Greek blockhouses on the frontier and killed six of the defenders.

In another skirmish two Turks were killed.

THE VETO.

MR. TAFT'S DEFENCE.

COLUMBUS (Ohio), Aug. 30. President Taft, in explaining his exercise of the power of veto, said that some friends had told him if any King had acted as he (Mr. Taft) had done, his head would have been dropped in a basket.

Mr. Taft retorted that he must act according to his conscience, even if his head did fall into a basket.

The trouble with the present-day reformer, Mr. Taft added, was that he wanted reforms put into force overnight, so as to have them ready for breakfast next morning.

## FOR PEACE.

## TURKEY AND ITALY.

## OFFICIAL FOUR-PARTIES IMMINENT.

ROME, Aug. 30. The Rome correspondent of the "Daily Mail" says there is every prospect of the initiation of official four-parties between Italy and Turkey, the correspondent states, is prepared to renounce her suzerainty over Tripoli, and the questions remaining for settlement include the amount of indemnity, capitulation of the Customs, and the disposal of the islands of the Aegean Sea that have been seized by Italy.

It is stated that unless official four-parties are quickly commenced, Italy will reopen an energetic campaign in the Aegean Sea.

ATTACK ON SYRIA.

20,000 TROOPS PREPARING.

LONDON, Aug. 31. The Rome correspondent of the "Daily Mail" states that Italy is preparing to send 20,000 troops to attack the Syrian coast.

UNITED STATES PRESIDENCY.

PROGRESSIVE PLATFORM.

ST. JOHNSBURY (Vermont), Aug. 31. Mr. Roosevelt, in a speech here last night, pledged the Progressives to votes for women.

Many women took part in the Progressive convention, one of them, Mrs. Jane Adams, an eight-hour day for women, the prevention of industrial accidents, and rural development.

Mr. Roosevelt is campaigning in Vermont in aid of the Progressives, who are making a determined fight for the governorship and other State offices.

The strength of the rival parties is expected to be fairly well shown by the result of these State elections.

"THEIR PROPER PLACE."

BOSTON, Sept. 1. Speaking at a Democratic demonstration here yesterday, Mr. Champ Clark, Speaker of the House of Representatives, stated that he was still convinced that he ought to have been the Democratic candidate for President.

He said that he was not a Democrat, but a Republican, and he never would be a Democrat, and he never would be a Republican.

He said that he was not a Democrat, but a Republican, and he never would be a Democrat, and he never would be a Republican.
